

CLASS MONITOR

Pre-requisites required -

The software has some pre-requisites.

- 1) You should've Outlook application downloaded and logged in onto your system. Make sure that the application is properly logged in with the correct credentials to proceed.
- 2) Turn on the developer mode in your excel file and make sure to turn ON the macros.

Working -

- 1) The extension makes a folder on the Local disk C of your system .
- 2) And then makes a folder with the name "My Attachments"
- 3) This folder "My Attachments" will be including all the attachments from Gmail.

The excel sheet will contain-

- Sender's name
- Attachments attached
- Received Time
- Sender's Email address

Meet Attendance

Collect attendance in a Google Sheet from a Google Meet.

Meet Attendance requires logging in and Syncing your Chrome browser. When in Meet select the participants view. Accept the permissions. Close and reopen the people to capture attendance. Click the Attendance icon to open the Attendance Spreadsheet. Mouse over for further options, Add a sheet in the Spreadsheet, Create a new Spreadsheet, Turn Attendance collection off, Auto Scroll through participants, Snapshot attendance. Attendance duration will be tracked.

Compare your classroom roster to the participants in the meet. Know who is absent from your Meet.

Use of JavaScript for automation -

Using JavaScript ,

Google form will be converted into a spreadsheet and the link of the spreadsheet will be sent to the website on another Google sheet. The new Google sheet link will be copied too.

And hence, in the output 2 spreadsheets would be generated . The link of these 2 spreadsheets will be copied and will run in Python file.

The result will be that the marks would be updated in the base file.
